CONCEPT

TRAIL-RUNNING INSPIRATION: Inspired from our trail running vests and especially our ADV SKIN series, the Out bags use the same technology with Flex SensiFit technology which stretches around your body, holding the load while letting you move.

TECHNOLOGY: The straps and back-pads are thermo molded and sculpted to fit your spine and shoulders, ensuring all day comfort and support on the trail. Flex SensiFit stretches comfortably around your torso while the shoulder straps adapt to your movements. The twin straps wrap your body more precisely. A combination of soft mesh and EVA foam comfortably and evenly supports the load. Wide vents and a central air channel offer ventilation.

MEN & WOMEN: Salomon created a series with specific bags for women. The bags are shaped to fit women's narrower shoulders and neck, and remove any pressure on the chest. The straps are designed to fit comfortably around a women's curved chest, allowing complete freedom of movement on the trail.

RULES BREAKER: Multifunctional bag : One pack for all the activity you do. Expandable main compartment, multiple stash points, a svelte speed shape and pole/ice axe holder.

MATERIALS

100d Ripstop Nylon

100% Nylon. A high performance pack fabric which perfectly balances low weight and excellent durability.

Stretch Nylon

86% Nylon, 14% Elastane. Used in our external pockets offers high stretch, water resistance and good durability.

Spacer Mesh

86% Polyester. Offers high air permeability and fast drying ensures breathability and comfort.

SUITABILITY

remove the LID of
your pack and pass
on Speed Mode !

SIZING

1. Measure back length: Take your measurement from the base of your neck to the top hip bone. Be sure that you take the measurement against the base of your spine.
2. Then check for your size and pick your backpack.

	ORDER SIZE	BACK LENGTH (CM)	BACK LENGTH (INCH)
WOMEN	S/M	38-43	15-17
	M/L	44-49	17,5-19,5

	ORDER SIZE	BACK LENGTH (CM)	BACK LENGTH (INCH)
MEN	S/M	43-48	17-19
	M/L	49-54	19,5-21,5

VOLUME EXPLANATION

The volume of the bag includes 2 volume measurements: The first which includes the expandable front pocket being filled normally and the second, it being filled to its maximum. This expandable pocket is made with a resistant elastic material which allows you to enjoy maximum benefits with its extra storage capacity and easy access to your gear during your effort.

Therefore, the second extra volume information on the product (for example, +5 for the OUT NIGHT 28+5 W) does not refer to the removable lid but with how much you can put in this expandable pocket, if filled to its maximum.

REF. : 329170

SOFT RESERVOIR 1.5L
REF. : 329168

SOFT RESERVOIR 2L
REF. : 378683

Salomon reinvented the way we hydrate. Your Out bag is compatible with bladders and flasks. You can effortlessly drink as soon as you feel thirsty to stay energized and perform better.

To use your bladder with your Out bag :

1. Insert your bladder in the internal bladder sleeve
2. Pass the bladder's tube through the assigned hole on the left side of the main opening
3. Pass the bladder's tube under elastic on the left shoulder strap

The side pockets are compatible with bottles and the front strap pocket can carry a 500l/17oz flask. To avoid unwanted movement with the flask, fasten its cap with the elastic string.

CARRY

POLES CARRYING SYSTEM

1. Insert the pole into the side pocket and lock with the elastic.
2. Do the same for the other side of your Out bag.

You can also put both poles in the same side pocket. It's also working.

CARRY YOUR ICE AXE

1. Get the hidden loop in the right side pocket.
2. Insert the axe through the loop and reverse it.
3. Lock the axe with the elastic and clip it.

CARRY

ATTACH YOUR HELMET

1. Use the bungee loop to attach the helmet.
2. Lock with the elastic.
3. Do the same on the other side.

ATTACH YOUR LIGHT

The OUT bags have a small reflective loop to be seen in the dark but it's also possible to attach a light for quick light attachment. Thus, you'll have visibility in the dark.

1. Secure light's clip through reflective attachment loop.
2. Light attachment loop is reflective, providing some visibility even without a light

UPKEEP

WASH YOUR PACK

- Do not tumble dry. To dry the bag, we'll advice a soft spin drying = max 600 turns per minute. Natural drying = Avoid the drum drying
- Do not bleach
- Do not dry clean
- Do not Iron
- Hand wash cold (30°C)

We'll advice a regular cleaning for this bag to regularly remove the sweat from the running sessions. (Sweat = bacteria = oxidization = odors = rings = bleaching accelerator)
Preferably hand washing with detergent.

Although not recommended, machine washing is permitted on delicate program (30°C) with soft spin cycle (max 600 turns per minute) while closing the straps beforehand and avoiding fabric softeners and rinsing with clear water. To dry the bag, we recommend natural drying and no tumble drying.

Sweat is an oxidization source on the zip sliders. You can protect the metal parts from the zips while rubbing them softly with a cotton swab moistened with vegetable oil (olive oil for instance) and while sliding the zippers 2 or 3 times. Do not put too much oil not to stain the bag!

WARRANTY

Salomon bags (including parts such as buckles, straps, etc) are guaranteed for 2 years from purchase date and only applicable against defects discovered within the Warranty Period and extends only to the original purchaser of the product. Click [here](#) for full warranty details and conditions.

Salomon hydration accessories manufactured by HydraPak are guaranteed for life. To submit a warranty claim for a Salomon by HydraPak product, click [here](#).

FREQUENTLY ASKED QUESTIONS

What are the differences between the OUT W packs and the OUT packs?

The Out W packs are shaped to fit women's narrower shoulders and neck, and remove pressure on the chest. The harness uses Flex SensiFit and Twin Straps to stretch comfortably around and move with you. A blend of soft mesh and EVA foam comfortably and evenly supports the load.

Once I remove the LID, can I use it as a belt?

No, you can not. Nonetheless, the LID is easily removable for fast and light adventures thanks to the Speed Top cover.
